

OUTDOOR & FAÇADE

→ DUBAI MALL DOWNTOWN, DUBAI, UAE.

Located next to the iconic Burj Khalifa, the tallest tower in the world, the Dubai Mall is one of the largest malls in the world and is about the size of 150 football fields.

SWITCH MADE had the tremendous honor to participate in the design & supply of all light fittings for the refurbishment of the Mall's Façade.

Within the approximate 52K LED luminaires installed, around 10km of Linear solutions have been used to showcase the amazing structure of the façade.

The overall lighting improved drastically in terms of uniformity, illuminance, color rendering, efficiency and consumption; not to mention the general perception of space and consumers experience.
