Sustainable Lighting is lighting designed with energy efficient light sources. The most sustainable source of light is daylight. Furthermore technologies such as LEDs are used to drastically reduce energy requirement for projects. MINERGIE P-ECO has been considered as the base standards for the lighting design for the Swiss International School. The MINERGIE standard stands for lower energy consumption at a higher level of comfort. Swiss International School is the 1st MINERGIE P-ECO building in MENA, 100% **SWITCH MADE** LED solution for indoor & outdoor.
