

➔ PRIVATE VILLA ARABIAN RANCHES, DUBAI, UAE.

The interior and exterior design of a home, depending on how it is illuminated, can contribute to the improvement of its overall appearance: accentuation downlight to heighten specific space, linear luminaires to highlight the void spaces in the ceiling, dimmable warm lights for a warm and cozy effect, and vivid lights for general illumination schemes.

SWITCH MADE Group made it all possible with a private villa situated in Arabian Ranches, Dubai - The lighting integrated into this idea produces a cozy ambiance with the use of Switch Made lighting solutions that are perfectly integrated into the villa design such as BLACKMOON, RESSY, LINE S1613, and LINE S0709.
