TECHNICAL DATA

LED	: CREE CXA2520
System Power	: 20 W
MacAdam Step	: SDCM <3
Luminaire Efficacy	: 120 lm/W (@5000K)
Lifetime	: L ₈₀ B ₁₀ 50,000Hrs, Ta@25°C
UGR	: -

GENERAL

Mounting	: Suspended, Indoor
Housing	: CNC extruded aluminium
Heatsink	: Aluminium
Diffuser	: Toughened glass (3mm thick)
Adjustability	: No
Driver Mounting	: Integrated
Emergency kit	: Not available

IP Rating	: IP65
IK Rating	: IK08
Protection Class IEC	: I
Energy Class	: A++
Working Temp.	: -20° to 60°C
Glow-wire test	: 650°
Weight	: 1.90 Kg
Warranty	: 3 yrs (extendable to 5 yrs)

NOTES

The first step in the process of identifying the appropriate level of care for a child is to determine whether the child has a mental health problem. This can be done through a clinical interview with the child and/or their parents, as well as through standardized assessment tools. Once a diagnosis has been established, the next step is to assess the severity of the problem and the child's functional impairment. This information will help guide the selection of the most appropriate level of care. For example, a child with mild anxiety may benefit from individual therapy, while a child with severe depression may require hospitalization. The final step in the process is to develop a treatment plan that addresses the child's specific needs and goals. This plan should be developed in collaboration with the child and their family, and it should be regularly reviewed and updated as needed.
